Combi-Folding Machine (with Electric control Knife)

Combi-folding machine With electric control knife is a folio buckle-knife combination folding machine with a pile feeder or around feeder. Parallel folding of the 660D can be carried out times with the buckle plates. The folding forms of the signatures may be concertina fold, parallel fold or letter fold. The 660E can handle parallel folding 2 times. Right angle folding can be carried out 3 times combination the buckle plates and the folding knives. At the same time of folding, perforating and creasing can be handled. The standard machine is suitable for handling 8mo, 16mo and 32mo signatures. The two-on folder can handle 32mo two-on signatures, except possessing the folding functions of the standard machine.

This machine adopts Japan's Omron, servo-controlled transmission systems, PLC control system, high-precision photoelectric, close to detection system, Frequency Control, color display screen contact. Fold knife by the servo motor control, stepping Fold knife controlled and adjusted by the servo motor is safe and convenient to debug, and can achieve full detection, tracking, data displaying, troubleshooting tips and so on, it is suitable for large and medium-sized printing factory. (Knife won the national electronic control technology patents and access to scientific and technological progress second prize.)

Technical Data :

Foldable max sheet size	660*1040mm
Foldable mix sheet size	150*200mm
Foldable sheet rotation range	40-200g/m ²
Folding & rolling max line speed	170m/min
Clasp knife max speed	200 strokes/min
Total power	6kw
Packing Size	main:2070*1630*1470mm
	vice:2920*1465*1610mm
	single:1460*870*1100mm
Total packing weight	2590kgs
