

Bailing Machine

Hydraulic Press for handling of WASTE-Paper, Corrugated Boards, Stationery (shredded / Un-shredded). Plastic / Films etc. Hydraulic device, compact in design, ideally suited for the pressing of said WASTE and manually bundling the pressed bales for saving in storage space, transportation and manpower.

Easy simple operation of handling waste by single person.

The bales ensure higher yield price.

Conveniently located Control Panel. One time activation of Switch for downward & upward movement of pressing platen.

The pressing function can be aborted for refilling fresh Waste material.

Tight wrapping of compressed waste and bound with Cords / Plastic straps / Hoops (wire) for ease of - handling for onwards stacking / transportation, two (Front) Strapping Grooves for bundling incorporated.

Power saving Device (built-in), the motor switches off automatically on attaining the set pressure or in Reset position of the Moving Platen.

The downward movement stops automatically on attaining the set pressure.
 Front loading of paper waste- material. Loading Area Widened by 22% over earlier models.
 Convenient removal of bales with the help of unique design - Ejector Device for removing the bale.

Spring Loaded Switch for up / downward travel in Manual Mode. The travel stops automatically with the help of the limit Switch in reset (loading) position.
 Baling Press can be supplied with 3Hp Motor (single phase supply) for tonnage up to 10-12 Tons.

Technical Specifications		
Description	Unit	Bailing machine
Bale Size-Width x Depth x Height	cm / (inch)	69x64x36-58/(27x25x14-23)
Baling Weight	kgs	60 to 100
Bailing Clamping Force (Max)	tons	24 - 30
Dry Cycle Time (Full Stroke)	seconds	15 - 20
Electrical Load / Motor	kw / HP	3.75 / 5
Electrical Supply	380 / 415V AC 50 Hz 3Ph	
Overall Dimension (WxDxH)	ltrs	175
Hydraulic Oil Capacity	cms	127x105x342
Net Weight (Approx.)	kgs	1550
